DATE MAILED: 07/05/2002

Notice of Fee Increase on October 1, 2002

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2002, then the amount due may be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on October 1, 2002. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Notice of Proposed Rulemaking, 67 Fed. Reg. 30634, 30636 (May 7, 2002). Although a change to the amount of the publication fee is not currently proposed for October 2002, if the issue fee or publication fee is to be paid on or after October 1, 2002, applicant should check the USPTO web site for the current fees before submitting the payment. The USPTO Internet address for the fee schedule is: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after October 1, 2002 (or mailed with a certificate of mailing on or after October 1, 2002), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Effective October 1, 2002, 37 CFR 1.18 is proposed to be revised to change the patent issue fees as set forth below. As stated above, the final fees may be a different amount, and applicant should check the web site given above when paying the fee.

(a) Issue fee for issuing each original or reissue patent, except a design or plant patent:

By a small entity (Sec. 1.27(a))--\$655.00

By other than a small entity--\$1,310.00

(b) Issue fee for issuing a design patent:

By a small entity (Sec. 1.27(a))--\$235.00

By other than a small entity--\$470.00

(c) Issue fee for issuing a plant patent:

By a small entity (Sec. 1.27(a))--\$315.00

By other than a small entity--\$630.00

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

On page 5, line 13, "5,920,518" has replaced "_____".

3. The application having been allowed, formal drawings are required in response to this Office Action.

The following changes to the drawings are required: the boxes in Figure 6 should be labelled (i.e., "computer system", "memory controller", "processor", etc., as appropriate) In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Art Unit: 2186

4. The following is an examiner's statement of reasons for allowance:

Although not specifically mentioned by the Board of Patent Appeals and Interferences, it is noted that the present invention, although producing a similar result, differs in design from the Johnson et al. system for the following reasons:

(1) In Johnson et al., the initial output timing is controlled by system clock circuit 202, which sends a timing signal to the memory devices 300 via driver 308. This system clock is never adjusted. Thus, there is no "*revising the initial output timing at the memory device*" as claimed.

The memory output timing is adjusted (revised) only *after* it has entered latch 322 in the memory controller.

(2) The phase difference in Johnson et al. is not measured by comparing the "received digital signal" (which is sent from the memory device to the controller along bus 320) to a reference signal; rather, it is *another* signal (disclosed column 6, lines 33-34, which state, "The mux driver 312 receives a signal indicative of the memory loading") which causes the appropriate (adjusted) timing reference signal to be selected from among a plurality adjusted signals.

In other words, the "digital signal" received from memory is not the same signal which causes the selection and transmission of the adjusted timing signal, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
